**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Sham et al (6571421).

Sham et al discloses an invention as recited in the claims. Sham et al disclose a portable cleaning apparatus having the components disclose in Jepson part of the claim as well as the improvement of a vapor generator (28) a heater (30).

3. Claims 41-45 are rejected under 35 U.S.C. 102(b) as being anticipated by Kasper et al (6131237).

Kasper et al discloses an invention as recited in the claims. Kasper et al disclose a portable cleaning apparatus having the components disclose in Jepson part of the claim as well as the improvement of a vapor generator (28) a heater (30) and agitator (206).

***Claim Rejections - 35 USC § 103***

Art Unit: 3727

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sham et al (6571421) in view of Harbeck (4397057).

- a. Sham et al discloses the claimed invention except for boiling.
- b. Harbeck discloses all of the claimed elements such as boiling and point above boiling ( Summary of Invention) were known in the prior art and one skilled in the art could have combined both the teaching and elements as claimed with no change in their respective functions by known methods and the combination would have yielded predictable results to one of ordinary skill in the art at the time the invention was made.

### ***Response to Arguments***

6. **Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.**

- c. Upon further review new art was uncovered which has been applied to the claims; Furthermore causing the application to be pulled from issue upon further review. Allowable subject matter has been withdrawn.
